Good evening,

Holly Osborne, District 5

There is a bill, AB 2251 that was passed in 2022. This bill requires urban areas to plan to increase their tree canopy. **The goal is an increase by 10% by the year 2035.** (I read your attachments; not sure if you make it or not. I apologize; my attention has been on another "track", also concerned with "greening.")

A screen shot of the bill is at the bottom.

.
A tree canopy is very important in this era of climate change. For example, just a couple blocks from me (at my latitude in North Redondo) a temperature of 74 degrees F was recorded in the shade, and 87 degrees F not in the shade. **That 13 degree difference** is the difference between a small kid being able to play outside vs not being able to play outside. It is the difference between an elderly person being able to walk outside vs not walk outside.

The canopy bill below seems in conflict with some of the recent state laws narrowing set backs, since setbacks are where trees can be planted.

I would like to suggest some additional steps for our city and citizens to take, in addition to what you have already proposed. . Next year is an election year. All candidates for Sen. Allen's office and Assemblymember Muratsuchi's office should be asked (drilled) on what they plan to do to resolve this conflict. . The city should be allowed to restore their setbacks to what they were before. We should be allowed to set lot coverage limits (we did not have them before), because green grass is also essential for cooling. Ask the candidates if they are going to work for those goals. And get neighboring cities to join us.

Thank you
Holly Osborne

Screen shot of AB 2251 text:

THE PEOPLE OF THE STATE OF CALIFORNIA DO ENACT AS FOLLOWS:

SECTION 1. Section 4799.10.2 is added to the Public Resources Code, to read:

4799.10.2. (a) (1) The department shall complete a statewide strategic plan, in consultation with nonprofit organizations, cities, counties, other local governments of urban areas, and disadvantaged and low-income communities, to achieve a 10-percent increase of tree canopy cover in urban areas by 2035, with priority for increasing tree canopy cover in disadvantaged and low-income communities and low-canopy areas. The statewide strategic plan shall include recommendations for all of the following:

(A) State and local policies necessary to achieve the goal of increasing tree canopy cover in urban areas by 10 percent by 2035.

(B) Targets and actions for canopy increase to be completed at the regional level by 2030 in a manner that is consistent with paragraph (3) of subdivision (a) of Section 4799.10 and that supports the 2035 statewide goal.

(C) Local resources needed for the maintenance and upkeep of urban forests and strategies to secure these resources.

(D) Resources and strategies to address threats to urban forests, including climate change, extreme weather, pollution, drought and limited water resource availability, diseases, and pests.

(E) Sustainable tree canopy expansion within disadvantaged communities and low-income communities.

(F) Measures to reduce or eliminate net loss of any existing tree canopy.

(2) The statewide strategic plan completed by the department pursuant to paragraph (1) shall be submitted to the Legislature on or before June 30, 2025.
