

Thank you for reaching out to us. As we resurface Kingsdale, we are addressing the following issues:

1. Left-turn movements at Kingsdale/Grant are currently not aligned with each other, which is not great for visibility. The southbound through lane on Kingsdale currently runs right into the parking lane. We are creating a dedicated northbound left-turn lane from Kingsdale to Grant so that through traffic doesn't get stuck behind left-turns, and the left-turn movements are facing each other like a conventional intersection. While this requires removing a few spaces on southbound Kingsdale, it improves visibility and safety for those left-turns, allows through traffic to not swerve to hit parked cars, and reduce congestion.

9 Spaces - Reduced by 5 spaces or 55%
reduction in parking
