1. Work with City staff and law enforcement to create survey maps of the city. Each map will be of a particular section of the City, with emphasis on known locations of unsheltered homelessness. Each map will be physically walked and/or driven in advance by Contractor, with detailed notes and instructions written for the outreach teams to follow on the days of the census.

Contractor shall:

1. Work with the City to secure, through local partner shelters, a sheltered homeless count on the day(s) of the unsheltered count. Because partner shelters' participation is voluntary, Contractor may not be able to access all sheltered data.
2. Aggregate sheltered numbers with the unsheltered data to the degree possible to provide the most complete possible depiction of homelessness in the city.

D. Veteran Count

Contractor shall prioritize the veteran sub-population in the census. Add questions to the survey in order to provide specific resources to this particular population.

E. Data Entry and Database Management.

Contractor shall:

1. Use GIS technology to complete the census electronically. Store the collected data securely in an online database.
2. Maintain the data on behalf of the City and provide the City with aggregate data.
3. If clients have consented to have their names stored in HIMS, use data security practices consistent with HMIS to ensure the names are only viewable by qualified staff at participating agencies.

In order to participate in the HMIS, leaders at each agency must sign an Agency Agreement that includes a commitment to protecting client data and maintaining confidentiality, and agency staff must pass multiple trainings on the importance of client privacy.

F. Final Reporting.

Contractor shall:

1. Deliver a final report within five weeks upon completion of the census.
2. Solicit input from City stakeholders, including but not limited to, City officials and staff, to ensure that desired data is captured and reflected in the report.
