SUBJECT: COUNCIL DISTRICT 4 - ALL-WAY STOP INSTALLATIONS

During the August 10, 2021 City Council Meeting, the Council determined the consideration of all-way stop controls at several intersections throughout the Council District area within District 4 bounded by the roadways of Aviation Blvd, Artesia Blvd, Inglewood Ave and Grant Ave. As part of Council's determination, Staff has been tasked with notifying residents of the potential installation(s) and to solicit feedback. If you've received this notification letter, it is because your residence is within a 150' radius of the six (6) subject one/two-way stop-controlled intersections within the aforementioned area and your input on the matter would be greatly appreciated. As identified in the image below, the subject intersections are:

Vanderbilt Lane at

- Green Lane and;
- Blossom Lane

Rockefeller Lane at

- Flagler Lane
- Phelan Lane
- Felton Lane and;
- Perkins Lane

Please provide your concerns and inquiries, especially if you object to the installation of all-way stop controls, to gene.kim@redondo.org by **Friday, October 1, 2021**.

Sincerely,

Gene Kim, P.E., T.E.
City Traffic Engineer

cc: Zein Obaji, District 4 Council Member
Ted Semaan, Director of Public Works

Joe Hoefgen, City Manager
Andrew Winje, City Engineer
